RS500 AND RS600 RIPENING ROOM DOORS

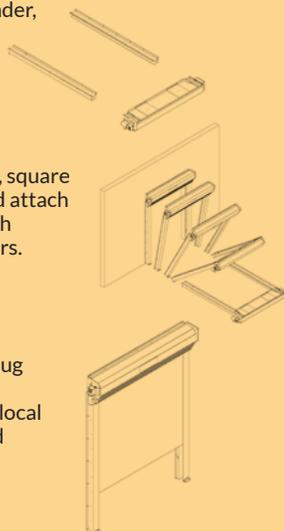

RollSeal™ fabric doors are constructed with a unique patented design which provides maximum protection against weather, temperature and air infiltration.

We have designed and engineered our door systems specifically for environmental control applications. They are packed with features that deliver the performance you demand. RollSeal™ provides a high value solution to the perennial challenges for these types of operations.

RollSeal™ Doors are the perfect fit for the ripening industry. Our sealing technology creates an airtight environment for your product, and our small footprint can easily adapt to areas with space limitations. Combine this with our rugged, maintenance free design and performance, and we know the RollSeal™ Door will serve as a long term, trouble-free solution for your operation.

EASY 3 STEP INSTALLATION

1. Slide tracks into header, bolt in place, plug in safety beam connectors.
2. Stand up in opening, square tracks to header and attach to wall and floor with appropriate fasteners.
3. Mount controller, plug in motor and signal connectors, wire to local power (by a licensed electrician) and run set-up program.

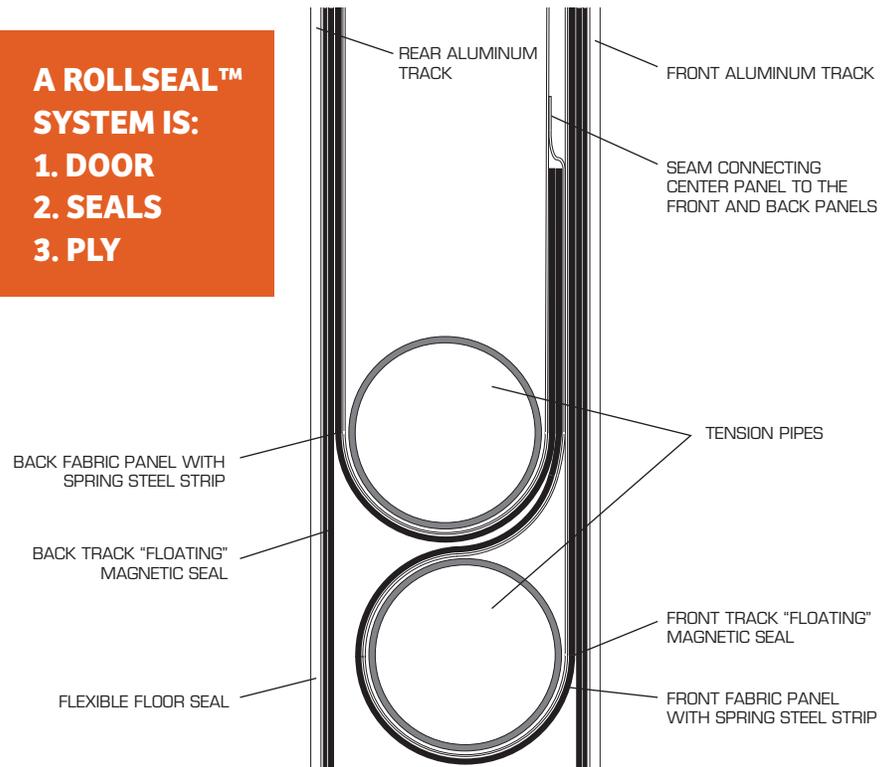

ROLLSEAL DOORS ARE BUILT NOT JUST TO MEET, BUT TO EXCEED YOUR EXPECTATIONS.

RollSeal™ understands that your daily operations require a commitment to energy savings and cost reduction. Our commitment to the design and manufacturing of our doors showcases that understanding. When you choose a RollSeal™ Door System, you're getting the best of both worlds: a system that's tough enough to withstand the daily demands of your operations *and* an energy efficient tool that **saves you money**.

Ultimately, you shouldn't have to choose between energy efficiency and performance. With RollSeal™, you know you're getting all of your needs met in one solution. **Efficiency, Safety and Performance ...** that's the true value of a RollSeal™ Door System.

A ROLLSEAL™ SYSTEM IS: 1. DOOR 2. SEALS 3. PLY

EFFICIENT

Whether you're responsible for ripening rooms in a large distribution center or a small town market, RollSeal™ understands that you need a door you can trust to be worry and maintenance free. We know that the ripening phase is a crucial portion of the overall supply chain of the valuable commodities held in your ripening chambers. With that in mind, we designed our door to be an efficient and worry-free component of your ripening room system. From our quick and easy three step installation process to the fact that RollSeal™ requires no maintenance schedule, this door is designed to work without you needing to lift a finger. Simply install the door and let it start saving you both time and money from day one.

- ▶ Increase environmental containment in ripening facilities
- ▶ Reduce inefficiencies of the ripening system by minimizing infiltration losses
- ▶ Maximize space, increase workflow and improve energy efficiency

NEVER SPEND YOUR TIME ADJUSTING, REPAIRING AND ALIGNING PANELS, HINGES, ROLLERS OR TRACKS AGAIN!

INTELLIGENT

Our patented process of mating the hook and loop components in the tracks creates continuous seals along the interior and exterior of the doorway, providing an air space between the layers of fabric, further separating the interior from the ambient exterior environment. This sealing system conserves energy and maintains constant climate control, while meeting or exceeding all ethylene sealing tests.

- ▶ No other product is better than the patented RollSeal™ Door at minimizing infiltration and separation of environmental elements.
- ▶ Compact design and easy installation simplifies upgrades to existing rooms and implementation into new construction.
- ▶ Compatible with industry activation methods (push button switch, motion sensor, floor loop, etc.)

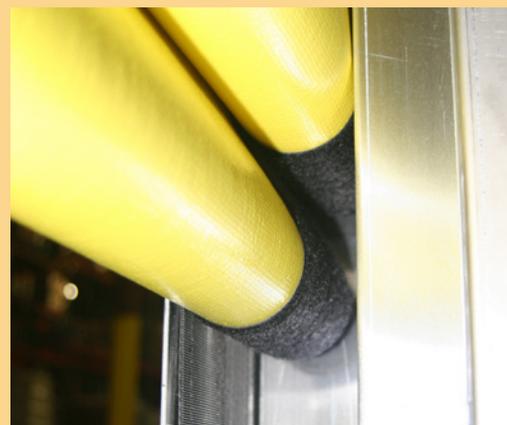

SAFE

Commitment to safety is at the forefront of our design priorities. The ETL and NSF compliant status demands that we meet the standards set for these applications. The host of features we offer will ensure that our system is a proven ally to any safety program. Additionally, the impact resistant design means no more denting or replacing metal panels.

- ▶ ETL and NSF compliant
- ▶ Emergency manual egress system available
- ▶ Safety beams, leading edge auto reverse sensor and soft start/stop standard
- ▶ Customized operating speeds
- ▶ LED indication of movement

AFFORDABLE

In an ever-increasing competitive business environment, we are all looking for an advantage to improve our ability to reach our goals. Whether your goals focus on reducing expenses, increasing productivity or ensuring customer satisfaction, the RollSeal™ Door System will be a valuable tool. From the moment of your initial purchase, **our system will exceed your expectations** through the many fiscal benefits to your organization. Reductions in cost still result in better efficiency, lower maintenance and improvement in productivity.

A SINGLE-SOURCE SOLUTION FOR GLOBAL NEEDS

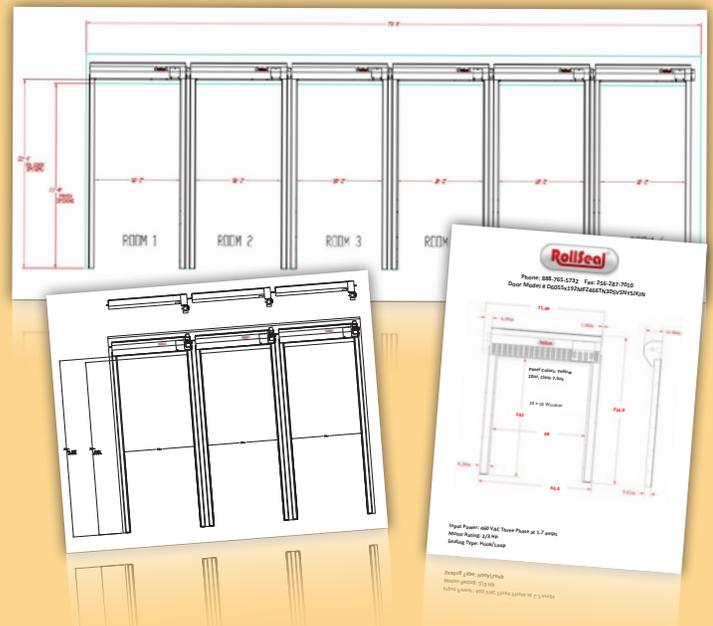

Since its inception, HH Technologies® has become widely recognized as one of the industry's leading suppliers of high-performance, automated door systems and related products. HH Technologies® RollSeal™ Door line provides simple, functional and inexpensive environmental control. All models offer a unique and affordable choice for applications where environmental control, pressurization and low cost are requirements. The heart of the RollSeal™ door is a unique, patented curtain sealing system that provides excellent environmental and thermal separation. When closed, RollSeal™ prevents the passage of airborne particles, including dust and moisture, providing temperature and thermal control. This virtually eliminates air infiltration. HH Technologies® prides itself on expertise and the technology to build each RollSeal™ door to fit your specific needs.

CUSTOMIZED TO MEET YOUR NEEDS ...

In the ripening market, where wall space is a constant issue, RollSeal™ can provide the solution for any size opening or space restriction. We will custom design a door to fit your space using your parameters or architectural drawings. Our engineers can insert your custom RollSeal Ripening door into your drawing package with clear opening dimensions and installed dimension call-outs.

Additionally, each RollSeal™ Ripening Door quote that you receive comes with a custom cut sheet showing all necessary dimensions for installation.

DID YOU KNOW...

CONVENTIONAL RIPENING ROOM FACILITY DOORS HAVE 30-50 HINGES... THE ROLLSEAL DOOR HAS ZERO.
